Re: Request for Information Regarding Operable Unit 9 of the Raymark Industries, Inc. Superfund Site, which includes Short Beach Park and the Stratford Landfill, and Notification to Potentially Interested Party of EPA's Remedial Investigation, Feasibility Study, and Proposed Cleanup Plan for Operable Unit 9

Dear Mr. Cote:

The United States Environmental Protection Agency ("EPA") is continuing to investigate the release or threatened release of hazardous substances, pollutants, and contaminants at Operable Unit 9 of the Raymark Industries, Inc. Superfund Site in Stratford, Connecticut ("Site"). This investigation includes an inquiry into the identification, nature, source, and quantity of materials transported to or generated, treated, stored, or disposed of at the Site. Operable Unit 9 is part of the larger Raymark Industries, Inc. Superfund Site.

This letter seeks your cooperation in providing information and documents relating to the environmental conditions at, and cleanup of, the Site. EPA is also seeking information concerning those persons responsible for the cleanup of the Site and their ability to undertake or finance that cleanup. Pursuant to the authority of Section 104(e) of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), 42 U.S.C. § 9604(e), you are hereby requested to respond to the Information Request set forth in the Enclosure to this letter.

While EPA seeks your voluntary cooperation in this investigation, compliance with the Information Request is required by law. Failure to provide a complete, truthful response to this Information Request within thirty (30) days of your receipt of this letter, or to adequately justify such failure to respond, may subject you to an enforcement action by EPA pursuant to Section 104(e) of CERCLA. This provision permits EPA to seek the imposition of penalties of up to

fifty-four thousand seven hundred and eighty-nine dollars (\$54,789) for each day of non-compliance.

Please note that responses which are incomplete, ambiguous, or evasive will be treated as complete non-compliance with this Information Request. Also be further advised that provision of false, fictitious, or fraudulent statements or representations may subject you to criminal penalties under 18 U.S.C. § 1001.

This Information Request is not subject to the approval requirements of the Paperwork Reduction Act of 1980, 44 U.S.C. § 3501 et seq.

Your response to this Information Request should be mailed to:

Due to the seriousness of the problem at the Site and the legal ramifications of your failure to respond properly, EPA strongly encourages you to give this matter your immediate attention and to respond to this Information Request within the time specified above.

Based on information contained in Site-related records, EPA believes that you may have a special interest in this Site. Accordingly, in addition to this Information Request, EPA is providing you with notice that EPA is in the process of collecting data to supplement the Remedial Investigation of the nature and extent of contamination at OU9, which was conducted in 2005. EPA will also be conducting a Feasibility Study of cleanup alternatives with the goal of selecting a cleanup remedy for the Site. EPA will select such a remedy after issuing for public comment EPA's preferred cleanup plan, which will be summarized in a document known as the Proposed Plan.

To provide you with an opportunity to participate in the remedy selection process, EPA will notify you regarding the availability of the Proposed Plan when it is published. The Proposed Plan will describe the Site, EPA's preferred alternative, and ways in which you and the interested public may participate in the remedy selection process. Also, parties that are potentially liable under Section 107 of the Superfund law may be liable to reimburse EPA for its costs of

performing response actions, including costs of investigation work, cleanup alternative evaluation, and selecting the remedy. If you wish to pay for or perform the Remedial Investigation or the Feasibility Study, please contact Ron Jennings as soon as possible.

Thank you for your cooperation in this matter.

OPERABLE UNIT 9 SITE DESCRIPTION

The Raymark Industries, Inc. Superfund Site ("Raymark Site") is located in the Town of Stratford in the southern part of Connecticut. Operable Unit 9 of the Raymark Site consists of approximately 94 acres of land and is currently known as Short Beach Park and the Stratford Landfill (the "Site"). The Site was initially one parcel of land known as the "Old" Stratford Landfill. A 1928 aerial photograph indicates that the Site consisted of a tidal wetland, with cottages located along the shore. By the late 1950s, the southern portion of the wetland (now Short Beach Park) was filled in and the northern portion of the wetland (now the Stratford Landfill) was filled in to the marine basin by 1968. In the 1970s, the "Old" Stratford Landfill was divided into two separate parcels by Dorne Drive. Short Beach Park is located on the southern portion of the "Old" Stratford Landfill and is owned by the Town of Stratford. The Stratford Landfill area is located on the northern portion of the "Old" Stratford Landfill and is owned by the Town of Stratford (southern section) and the City of Bridgeport (northern section along the Marine Basin). Operable Unit 9 consists of what is now referred to as Short Beach Park and the Stratford Landfill.

The Stratford Landfill area is located to the north of Dorne Drive, at the intersection of Short Beach Road and Main Street, and between Sikorsky Airport and the Housatonic River. The property consists of approximately 29.8 acres of land that abuts the Housatonic River, approximately one-half mile north of Stratford Point. Short Beach Park is located at the delta of the Housatonic River with the Long Island Sound and consists of approximately 64.1 acres of land. The beach is bordered by Dorne Drive and Short Beach Road. After the closure of the "Old" Stratford Landfill, a golf course was created on the southern portion of the former landfill. A park area opened in 1987 and includes a beach, bath houses, tennis courts, and baseball, softball and soccer fields.

Further information about the Raymark Site in general and OU9 in particular can be found at the following website: www.epa.gov/superfund/raymark
